Launch of a new investment project

The Board of Directors of ASTARTA Holding N.V. (the **Company**) informs that the Company launched an investment project to add a new technological line of advanced soybean processing to the existing soybean processing facilities in the Poltava region of Ukraine. The production capacity of the line is up to 100kt of soy protein concentrate per year. The project timeline is two years and planned investment is circa USD50m.

The technology is innovative for Ukraine. The soy protein concentrate is made by aqueous alcohol extraction from granulated soybean meal. Soy concentrate is used as a high-quality feed component for livestock, poultry and fish.
