

SEMIANNUAL REPORT OF THE BOARD OF DIRECTORS

for the 6 months ended 30 June 2015

Astarta Holding N.V.

OVERVIEW

The first half of the year was marked by focused efforts of the management team to secure efficient operations and sustainability of ASTARTA in rapidly changing markets and a challenging macroeconomic environment.

Ukrainian continued its struggle with economic woes exacerbated by the military conflict. It is certainly premature to state that the crisis has reached its tipping point. Still, there are some important reassuring indicators like improvement of the trade balance, stabilization of the currency exchange rate, contained inflation and slowing decline in industrial production in recent months. The government started implementation of major structural economic reforms agreed upon with the International Monetary Fund.

In today's challenging environment, ASTARTA demonstrated robust operating performance. In farming, we already see positive results with the bulk harvest of early grains gaining 20% year over year mostly based on growing yields. The soybean crushing segment performed with a solid margin and generated a stable positive cash flow. In sugar, we are actively preparing for a new production season and see reassuring indicators of lower processing costs on a back of falling energy prices. The dairy segment is performing net-positive despite depressed pricing for milk.

Financial results of the first six months are both below the company's intrinsic potential but encouraging. While recording a 20% correction in revenues and EBITDA, ASTARTA demonstrated improved gross and stable operating margins. The net financial result almost doubled, the proportion of exports in sales grew to a record 38%, and net debt adjusted for readily marketable inventories further reduced.

When times are hard it is important to focus on meeting ongoing challenges and still keeping ones long-term strategic perspectives. As prices for most grains, milk and sugar are at years-low, we have to double our efforts towards higher efficiency and achieving lower cost of production. At the same time, we continue thinking long-term and remain highly committed to our strategy of growth, diversification and leadership.

KEY FINANCIAL RESULTS

- Consolidated revenues were EUR 126 million - down 23% y-o-y (while UAH-denominated revenues grew 30%). The correction came mainly because of the lower volumes of sales of some key products, devaluation in the national currency as well as lower sugar and milk prices.
- Cost of goods sold decreased by 32% to EUR 81 million.
- Gross profit amounted to EUR 94 million, down 15% y-o-y. At the same time, the gross profit margin improved by 10 percentage points to 74%.
- EBITDA was EUR 89 million, down 22%. The EBITDA margin remained at 70% mark.
- Cash flow from operational activities amounted to EUR 41 million.
- Net debt was EUR 206 million and Net debt/EBITDA (LTM) was at a comfortable 2.2x level.
- Export sales demonstrated an increase to 38% of total sales.

TOTAL DEBT RATIO	(Total current liabilities + total non-current liabilities) / Total assets
CURRENT RATIO	Total current assets / Total current liabilities
QUICK RATIO	(Total current assets – inventories – biological assets) / Total current liabilities

SUGAR SEGMENT

The sugar segment traditionally remained the largest contributor to revenues with a 47% share. It generated EUR 60 million, which is 25% lower compared to the same period a year ago, mainly because of a correction in euro denominated sugar price. Volumes of sugar sales increased 2% to 156 thousand tonnes. Sugar exports were 20 thousand tonnes. Key export destinations included a few Asian and European Union countries, the later - following provisions of a free trade agreement with the EU. Exports contributed 15% of the segment's revenues.

Devaluation of the Ukrainian Hryvnia improved the competitive position of local sugar producers and stimulated export sales. Thus, for the first half of the year Ukraine exported over 170 thousand tonnes of sugar, reducing the inventories' pressure on the local market. Still, current white sugar price in Ukraine remains close to years-low levels and is promoting further consolidation in the industry.

Sugar prices dynamics

After bumper production of sugar in 2014, the beet planting area in Ukraine declined 42% to a record low 230 thousand hectares. Market analysts expect that limited sugar production in Ukraine in the coming season will stimulate sugar price recovery in 2015/2016 marketing year.

Plantations under sugar beet in Ukraine

Source: Ukraine State Statistical Service, Company data

On a global stage, recent research of the leading analytical agency Green Pool forecasts an increase in sugar production shortfall to 4.6 million tonnes for 2015/16 MY. FC Stone agency forecasts the level of global sugar deficit of 3.9 million tonnes, while Rabobank predicts a shortfall – of 3.4 million tonnes. The experts also highlight the strengthening El Nino weather pattern, which has a habit of bringing undue dryness to Southeast Asia, besides increased spring and summer rainfall for south-central Brazil. At the same time, global inventories of sugar are high, oil price is falling, and current spot and futures' level for raw and white sugar are at years-low.

AGRICULTURAL SEGMENT

During the reporting period the revenues of the agricultural segment amounted EUR 21 million (26% lower y-o-y). The main reasons for this decline were a correction in commodity prices and lower volumes of crops sold following reduced harvest in 2014. Contribution of the segment to consolidated revenues remained 17%.

In the beginning of August, ASTARTA completed harvesting early grain crops. This year the harvested volume of early grain crops is 20% higher than in 2014 and amounts nearly 270 thousand tonnes. The average yield of wheat was at 5.5 tonnes per hectare.

The advance was assured by well-organized operations, application of advanced agro-technologies, and supported by mild weather conditions. Simultaneously, the company concentrated on cost control and has been introducing modern computerized operations' control and management systems.

The major part of early grain crops harvested by ASTARTA in 2015 is of upper grades and of premium quality. Harvesting of technical crops, namely sugar beets, sunflower, soybeans and corn, is due to start soon. These crops are in good condition and have good yield potential.

ASTARTA's winter wheat production dynamics

Source: Company data

As of the date of the report publication, Ukraine harvested 31.2 million tonnes of early grain crops. The average yield for crops is 3.48 tonnes per hectare compared to 3.51 tonnes per hectare a year ago. Overall Ukrainian harvest this year is expected slightly below to the last year's benchmark.

Production and export of grains in Ukraine

Source: APK-inform

Globally, most market analysts do not see potential for material rebound of grain prices in the nearest future. The expectations for world total grains production remained mostly favorable. Positively, global consumption is projected to stay high, with growth in food and industrial demand stimulated by lower prices.

SOYBEAN PROCESSING SEGMENT

Revenues in the segment amounted to EUR 31 million (17% lower y-o-y). Sales volumes for soybean oil and meal corrected 6% and 23%, respectively. 100% of soy oil and 36% of soy meal were exported. The decline in selling volumes and segments revenues is mainly linked to efficient application of a tolling of third parties soybeans, which allowed keeping healthy profitability while simultaneously saving on working capital needs.

During the reporting period the soybean processing plant was operating smoothly and has processed over 107 thousand tonnes of soybeans. Meal and oil production increased 5% to 80 thousand tonnes and 19 thousand tonnes, respectively. With this, ASTARTA was the largest and highly efficient soy processor in Ukraine.

Leading Ukrainian soybean processors for the 6 months of 2015

Source: Agrochart

In 2015, ASTARTA's production subsidiaries planted about 63 thousand hectares of soybeans. The harvesting campaign is expected to begin in coming days and will secure the high level of self-sufficiency of soybeans for the processing segment. In Ukraine, harvest of soybeans is expected at an all-time high 4.2 million tonnes (+8.2% y-o-y).

Currently one of our priorities for the soybean processing segment is concentrate on expansion of the clients' portfolio and an increase of soybean meal exports. Fundamentally, we believe that in coming years the demand for soybean meal will be favored by a continuous rise in global animal protein production.

DAIRY SEGMENT

The dairy segment generated EUR 12 million (22% lower y-o-y). Sales volumes increased 4% to 50 thousand tonnes while the average selling milk price dropped about 30%.

During the reporting period, ASTARTA slightly lowered the headcount of cows by 2% to 15.9 thousand head, while the cattle headcount declined 7% to 29 thousand head. This reduction is a natural response to the changing market environment and supports the strategy of promoting the most productive cows and high cost efficiency.

At the same time, the Ukrainian dairy industry continues to decline. Milk production dropped 4.5% to 5.4 million tonnes. Milking cows' headcount in the country dropped by 8% to 2.3 million. The recovery in industry trends will obviously take some time to realize since the market is heavily hampered by a sharp drop in global dairy prices, import limitations by Russia as well as suppressed local demand for dairy products in Ukraine.

STATEMENT OF THE BOARD OF DIRECTORS

Representation

of the Board of Directors of ASTARTA Holding N.V. on compliance of the condensed consolidated interim financial statements.

The Board of Directors of ASTARTA Holding N.V. hereby represents that to the best of their knowledge the condensed consolidated interim financial statements of ASTARTA Holding N.V. for the period ended 30 June 2015 and the comparable information were prepared in accordance with the applicable accounting standards and that they give a true, fair and clear view of the assets, financial standing and financial results of STARTA Holding N.V., and that the interim statement for the six months ended 30 June 2015 gives a true view of the developments, achievements and situation of the Company, including a description of the key risks and threats.

The notes on pages 25 to 47 are an integral part of these condensed consolidated interim financial statements.

1 BACKGROUND

(a) Organisation and operations

These consolidated financial statements are prepared by ASTARTA Holding N.V. (the Company), a Dutch public company incorporated in Amsterdam, the Netherlands, on 9 June 2006 under the Dutch law.

The Company's legal address is Jan van Goyenkade 8, 1075 HP Amsterdam, the Netherlands.

On 4 July 2006 the shareholders of the Company contributed their shares in the Cyprus based company Ancor Investments Ltd to ASTARTA Holding N.V. After the contribution, ASTARTA Holding N.V. owns 100% of share capital of Ancor Investment Ltd.

Ancor Investments Ltd owns 99.98% of the capital of LLC "Firm "Astarta-Kyiv" (Astarta-Kyiv) registered in Ukraine, which in turn controls number of subsidiaries in Ukraine (hereinafter the Company and its subsidiaries are collectively referred to as the "Group").

On 16 August 2006 the Company's shares were admitted for trading on the Warsaw Stock Exchange. The first quotation of the shares on the Warsaw Stock Exchange took place on 17 August 2006.

The Group specializes in sugar production, soybean processing, crop growing and dairy farming. The croplands, sugar plant, soybean processing plant and cattle operations are mainly located in the Poltava, Vinnytsia, Khmelnytsky and Kharkiv oblasts (administrative regions) of Ukraine. The Group's business is vertically integrated because sugar is produced primarily using own-grown sugar beet and soybean processing is secured by significant amount of in-house produced soybeans.

(b) Ukrainian business environment

The Group conducts most of its operations in Ukraine. The Ukrainian economy while deemed to be of market status continues to display certain characteristics consistent with that of an economy in transition. These characteristics include, but are not limited to, low levels of liquidity in the capital markets, high inflation, and significant imbalances in the public finance and foreign trade.

In 2014, Ukrainian political and economic situation deteriorated significantly. The annexation of the Autonomous Republic of Crimea by the Russian Federation, full-fledged armed confrontations in certain parts of the Donetsk and Lugansk regions and, ultimately, to the significant deterioration of the political and economic relations of Ukraine with the Russian Federation have contributed to the decline of key economic indices, increase of the state budget deficit, depletion of the NBU's foreign currency reserves and, as a result, further downgrading of the Ukrainian sovereign debt credit ratings.

From 1 January 2015 and up to 30 June 2015, the Ukrainian Hryvnia (the «UAH») depreciated against EURO by approximately 22% calculated based on the National Bank of Ukraine (the «NBU») exchange rate of UAH to US Dollar. The NBU imposed certain restrictions on purchase of foreign currencies, cross border settlements (including repayment of dividends), and also mandated obligatory conversion of foreign currency proceeds into UAH.

The known and estimable effects of the above events on the financial position and performance of the Group in the reporting period have been taken into account in preparing these consolidated financial statements.

The Government has committed to direct its policy towards the association with the European Union, to implement a set of reforms aiming at the removal of the existing imbalances in the economy, public finance and public governance, and the improvement of the investment climate.

Stabilisation of the Ukrainian economy in the foreseeable future depends on the success of the actions undertaken by the Government and securing continued financial support of Ukraine by international donors and international financial institutions.

Management is monitoring the developments in the current environment and taking actions, where appropriate, to minimize any negative effects to the extent possible. Further adverse developments in the political, macroeconomic and/or international trade conditions may further adversely affect the Group's financial position and performance in a manner not currently determinable.

2 BASIS OF PREPARATION

(a) Statement of compliance

These condensed consolidated interim financial statements for the six months ended 30 June 2015 have been prepared in accordance with IAS 34 Interim Financial Reporting.

These condensed consolidated interim financial statements do not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the Company's annual financial statements for the year ended 31 December 2014 which have been prepared in accordance with IFRS.

(b) Basis of consolidation

The consolidated financial statements comprise the financial statements of the Group and its subsidiaries as at 30 June 2015. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Specifically, the Group controls an investee if and only if the Group has:

- Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee)
- Exposure, or rights, to variable returns from its involvement with the investee, and
- The ability to use its power over the investee to affect its returns

When the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee
- Rights arising from other contractual arrangements
- The Group's voting rights and potential voting rights

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the statement of comprehensive income from the date the Group gains control until the date the Group ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

If the Group loses control over a subsidiary, it:

- Derecognises the assets (including goodwill) and liabilities of the subsidiary
- Derecognises the carrying amount of any non-controlling interests
- Derecognises the cumulative translation differences recorded in equity
- Recognises the fair value of the consideration received
- Recognises the fair value of any investment retained
- Recognises any surplus or deficit in profit or loss
- Reclassifies the parent's share of components previously recognised in OCI to profit or loss or retained earnings, as appropriate, as would be required if the Group had directly disposed of the related assets or liabilities.

As at 30 June 2015 Astarta Holding N.V. owns shares, directly and indirectly, in a number of subsidiaries, joint operations and an associate with the following percentage of ownership:

Name	Activity	30 June 2015 % of ownership	31 December 2014 % of ownership	30 June 2014 % of ownership

All subsidiaries, joint operations, and the associate, except for Ancor Investments Ltd, are incorporated in Ukraine. Ancor Investments Ltd is incorporated in Cyprus.

(c) Functional and presentation currency

Each entity in the Group determines its own functional currency and items included in the separate financial statements of each entity are measured using that functional currency. The functional currency of the Company and its Cypriot subsidiary is Euro (EUR). The operating subsidiaries and associate registered in Ukraine have the Ukrainian hryvnia (UAH) as their functional currency.

The consolidated financial statements are presented in UAH and all values are rounded to the nearest thousand, except when otherwise indicated. For the benefit of certain users, the Group also presents all numerical information in EUR. The translation of UAH denominated assets and liabilities into EUR in these consolidated financial statements does not necessarily mean that the Group could realize or settle in EUR the reported values of these assets and liabilities. Likewise, it does not necessarily mean that the Group could return or distribute the reported EUR value retained earnings to its shareholders. For the purposes of presenting financial information in EUR, assets and liabilities of the Ukrainian subsidiaries and associate are translated from UAH to EUR using the closing rates at each reporting date, and income and expenses, and cash flows are translated at the rates ruling at transactions date.

On 07 February 2014 the National Bank of Ukraine (NBU) changed an exchange-rate regime from fixed to floating. Therefore starting from 07 February 2014 the Group applies the NBU exchange rates instead of interbank exchange rates. The resulting translation differences are recognized in other comprehensive income presented in EUR.

The principal Ukrainian Hryvnia (“UAH”) exchange rates used in the preparation of the consolidated financial statements are as follows:

Currency	Average reporting period rate		Reporting date rate		
	2015	2014	30 June 2015	31 December 2014	30 June 2014
EUR	23.83	14.10	23.54	19.23	16.09
USD	21.36	10.28	21.02	15.77	11.82

3 SIGNIFICANT ACCOUNTING POLICIES

The accounting policies and methods of computation adopted in the preparation of these condensed consolidated interim financial statements are the same as those applied by the Group in its annual financial statements for the year ended 31 December 2014 except for the adoption of new Standards and Interpretations noted below.

New and amended standards and interpretations not yet adopted

The standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Group's financial statements are disclosed below. The Group intends to adopt these standards, if applicable, when they become effective.

IFRS 9 Financial Instruments

In July 2014, the IASB issued the final version of IFRS 9 Financial Instruments which reflects all phases of the financial instruments project and replaces IAS 39 Financial Instruments: Recognition and Measurement and all previous versions of IFRS 9. The standard introduces new requirements for classification and measurement, impairment, and hedge accounting. Retrospective application is required, but comparative information is not compulsory. The adoption of IFRS 9 will have an effect on the classification and measurement of the Group's financial assets, but will potentially have no impact on the classification and measurement of the Group's financial liabilities. IFRS 9 is expected to be endorsed by the European Union («EU») before the IASB effective date, which is 1 January 2018.

IFRIC Interpretation 21 Levies (IFRIC 21)

IFRIC 21 clarifies that an entity recognises a liability for a levy when the activity that triggers payment, as identified by the relevant legislation, occurs. For a levy that is triggered upon reaching a minimum threshold, the interpretation clarifies that no liability should be anticipated before the specified minimum threshold is reached. IFRIC 21 is effective for annual periods beginning on or after 17 June 2014. The Group is currently assessing the impact of IFRIC 21 on the financial statements.

Amendments to IFRS 10 and IAS 28 Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

The IASB has published 'Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28)'. The amendments address a conflict between the requirements of IAS 28 'Investments in Associates and Joint Ventures' and IFRS 10 'Consolidated Financial Statements' and clarify that in a transaction involving an associate or joint venture the extent of gain or loss recognition depends on whether the assets sold or contributed constitute a business. The amendments have not been endorsed by the EU. The IASB effective date is 1 January 2016. The Group is currently assessing the impact of these amendments on the financial statements.

IFRS 15 Revenue from Contracts with Customers

IFRS 15 was issued in May 2014 and establishes a new five-step model that will apply to revenue arising from contracts with customers. Under IFRS 15 revenue is recognised at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer. The principles in IFRS 15 provide a more structured approach to measuring and recognising revenue.

The new revenue standard is applicable to all entities and will supersede all current revenue recognition requirements under IFRS. Either a full or modified retrospective application is required for annual periods beginning on or after 1 January 2018 with early adoption permitted. The Group is currently assessing the impact of IFRS 15 and plans to adopt the new standard on the required effective date.

Amendments to IFRS 10, IFRS 12 and IAS 28 Investment Entities: Applying the Consolidation Exception

The amendments address issues that have arisen in the context of applying the consolidation exception for investment entities. These improvements have not been endorsed by the EU. The IASB effective date is 1 January 2016. The Group is currently assessing the impact of these amendments on the Group's consolidated financial statements.

4 BUSINESS COMBINATIONS AND DISPOSAL OF JOINT OPERATIONS

Acquisition of new entities in 2015

During six months ended 30 June 2015, the Group completed acquisition of LLC «Savyntsi Agro» which is non-listed agricultural company located in Ukraine with the purpose to expand the agricultural land leases bank. On 23 January 2015, the Group acquired 99.98% ownership interest in LLC «Savyntsi Agro» for cash consideration of UAH 11,746 thousand or EUR 462 thousand.

As at acquisition date, accounts receivable of UAH 98 thousand and other accounts payable of UAH 14,127 thousand were due to/ from the Group. The purchase consideration consisted only of cash, and the direct costs related to this acquisition are not significant.

The acquisition of the company had the following effect on assets and liabilities, which are stated at their fair values, as at the date they were acquired:

	Recognised fair value at acquisition	
	(in thousands of Ukrainian hryvnias)	(in thousands of Euros)
	(unaudited)	(unaudited)
Non-current assets		
Property, plant and equipment	982	42
Intangible and other non-current assets	8,564	364
Current assets		
Inventories	5,702	240
Trade accounts receivable	1,201	50
Other accounts receivable and prepayments	2,788	117
Cash and cash equivalents	213	9
Non-current liabilities		
Other long-term liabilities	(4,208)	(177)
Current liabilities		
Trade accounts payable	(38)	(2)
Other liabilities and accounts payable	(14,771)	(621)
Net identifiable assets, liabilities and contingent liabilities	433	22
Non-controlling interest	(2)	-
Net assets acquired	431	22
Goodwill	(11,315)	(471)
Consideration paid	(11,746)	(493)
Cash acquired	213	9
Net cash outflow	(11,533)	(484)

Acquisition of new entities in 2014

In January 2014, the Group obtained control over its former joint operation SC «Agricultural company named after Ivanenko» by merging it with the Group's subsidiary LLC «Agricultural company «Mirgorodska». As at acquisition date, all accounts receivable of UAH 14,115 thousand and accounts payable of UAH 14,115 thousand were due to/ from the Group. The acquisition was made at no consideration because the entity's net assets equalled nil at the date of acquisition.

The fair value of assets and liabilities as at acquisition date are as follows:

	(in thousands of Ukrainian hryvnias)	(in thousands of Euros)
Assets		
Accounts receivable	14,115	1,233
Liabilities		
Accounts payable	(14,115)	(1,233)
Net identifiable assets, liabilities and contingent liabilities		
	-	-
Consideration transferred	-	-
Result from acquisition	-	-

It is not possible to identify revenue and profit/ or loss contributed by the newly acquired entity because it was merged with the Group's subsidiary LLC «Agricultural company «Mirgorodska».

5 PROPERTY, PLANT AND EQUIPMENT

During the six months ended 30 June 2015, the Group acquired assets with a cost of UAH 115,848 thousand or EUR 4,862 thousand. Property, plant and equipment of UAH 982 thousand or EUR 42 thousand were acquired through a business combination (see Note 4).

During the six months ended 30 June 2014, the Group acquired assets with a cost of UAH 102,983 thousand or EUR 7,305 thousand.

Assets with a carrying amount of UAH 34,417 or EUR 1,444 thousand were disposed of during the six months ended 30 June 2015 (2014: UAH 11,978 or EUR 849 thousand).

6 INTANGIBLE ASSETS

During the six months ended 30 June 2015 the Group acquired intangible assets of UAH 20,173 thousand or EUR 847 thousand. Intangible assets of UAH 8,564 thousand or EUR 364 thousand were acquired through acquisition of subsidiaries (see Note 4).

During the six months ended 30 June 2014 the Group acquired intangible assets of UAH 1,342 thousand or EUR 94 thousand.

Disposals for six months ended 30 June 2015 amounted to UAH 24 or EUR 1 thousand. Disposals for six months ended 30 June 2014 amounted to UAH 277 or EUR 20 thousand.

7 BIOLOGICAL ASSETS

	16	233	1	17
	19,843	5,495	833	390

22 INCOME TAX EXPENSE

Certain companies in the Group are subject to income taxes. Income tax expense for these companies for the six months ended 30 June is as follows:

	<i>(in thousands of Ukrainian hryvnias)</i>		<i>(in thousands of Euros)</i>	
	2015 (unaudited)	2014 (unaudited)	2015 (unaudited)	2014 (unaudited)
Current expenses	(28,888)	(3,143)	(1,212)	(224)
Deferred expenses	70,022	(877)	2,939	(62)
	41,134	(4,020)	1,727	(286)

In 2015, 16 subsidiaries elected to pay FAT in lieu of other taxes (2014: 23 companies). FAT expense is included to cost of revenues. The remaining companies were subject to the Ukrainian corporate income tax at 18% rate (2014: 18%), Dutch corporate income tax rate of 25% and Cypriot income tax rate of 12.5%.

23 SEGMENT REPORTING

At 30 June 2015 and 2014, the group is organized into four main business segments:

- production and wholesale distribution of sugar and sugar by-products
- growing and selling grain and oilseeds crops (agriculture)
- processing and wholesale distribution of soybean products: soybean meal, soybean hydrated oil and granulated soybean husks
- dairy cattle farming.

Other group operations mainly comprise the sales of gas.

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker is the management board.

Revenues from external customers are measured in a manner consistent with that in the income statement. Transfer prices between operating segments are on arm's length basis in a manner similar to transactions with third parties.

The sugar segment is highly seasonal, as sugar plants normally operate during September – December processing sugar beets harvested in September-November.

The agriculture segment, in the first half of the Group's financial year due to seasonality and the implications of IAS 41, reflects the effects of the valuation of biological assets and the sale of carried-forward agri produce, while financial performance during the second half of the financial year mainly reflects the sale of crops and the effects of the revaluation of agri produce carried forward.

The amounts provided to the Board of Directors with respect of total assets are measured in a manner consistent with that of the financial statements. These assets are allocated based on the operations of the segment and the physical location of the asset. Investments classified as available-for-sale financial assets are not considered to be segment assets. The amounts of total liabilities are measured in a manner consistent with that of the financial statements. Liabilities are allocated based on the operations of the segment.

The segment information for the six months ended 30 June 2015 is as follows:

(in thousands of Ukrainian hryvnias)	Production and wholesale distribution of sugar		Agriculture		Cattle farming		Other businesses		Soybean processing		Unallocated		Total

24 RELATED PARTY TRANSACTIONS

The Group performs transactions with related parties in the ordinary course of business. Related parties comprise the Group's associates, joint ventures, the shareholders, companies that are under control of the Group's shareholders, key management personnel and their close family members and companies that are controlled or significantly influenced by shareholders. Prices for related party transactions are determined on an ongoing basis. The terms of related party transactions may differ from market terms.

The following table provides the total amount of transactions that have been entered into with related parties for the six months ended 30 June 2015 as well as balances with related parties as of 30 June 2015:

<i>(in thousands of Ukrainian hryvnias)</i>	Sales to related parties: (unaudited)	Purchases from related parties: (unaudited)	Amounts owed by related parties: (unaudited)	Amounts owed to related parties: (unaudited)
Companies under common control	17	3,543	16,725	59,608
